TOP 10 reasons to choose compareDocs to see the difference

1 Speed

Find every change in seconds. compareDocs is 3-5x faster than the competition, according to independent testing.

2 Accuracy

Our native comparison method doesn't convert files before comparing, so it is accurate across all document types – including Excel and PowerPoint.

3 Fast review cycles

Users can accept or reject changes in a Word document marked up with Track Changes. This produces the next version 25% faster than static reports.

4 Flexible

Choose a comparison report format that works for you, such as redline or Track Changes. View your report in Classic or 3-Pane View.

5 Multi-format

compareDocs works with any file type, including Word, PDF, Excel, and PowerPoint. It will also compare your scanned documents thanks to integrated OCR.

6 Universal

No custom styles are used in comparison reports, and you can review the changes in Word or Adobe Reader. This means anyone can view your comparison report.

7 Simple UI

A deliberately simple UI means users can get up to speed quickly with minimal training required.

8 MS Office integration

Microsoft Office integration means seamless workflows. Launch a comparison from within Word and compare email attachments in Outlook.

9 DMS integration

Enjoy more streamlined workflows. Right-click to compare files saved in a document, case, or practice management system. Save comparison reports as a new document or version.

10 Cloud app

compareDocs is available in the cloud as a Microsoft Word Add-in for macOS, iOS, and Android. Compare on anything. Work from anywhere. Stay secure.
